ABOUT CBSET

CBSET is a state-of-the-art translational research institute located in the greater Boston area of Massachusetts.

Our mission is to advance biomedical research through innovative, high-quality services. We combine top-tier research with operational expertise. Since our inception, CBSET has continued to develop technical and scientific acumen through collaborative projects in the medical device, pharmaceutical and academic communities. Our GLP-compliant, AAALAC-accredited facilities include vivaria, procedure rooms, catheterization/imaging labs, surgical and necropsy suites, histopathology, SEM, and a range of other technologies.
